ROMANO DROM (5) Technical rider

Sound:

PA:

The sound system shall be set up and tested to be in complete working order before the arrival of Romano Drom. The PA should be capable of evenly covering the entire listening area, offer appropriate Subbass and must be able to reach loud (100 dBA at mix position) levels without audible distortion. All speaker enclosures should be of a reputable brand (Funktion One, EAW, Turbosound, d&b,Nexo, Meyer, JBL or equivalent).

The PA should also include ample amplification, as well as all cables and necessary

rigging hardware. The number of speakers depends on the type of speaker and size

of venue. Estimated total power capacity in Watts = Venue capacity x 10.

Please also provide a suitable FOH mixing console (24 channel minimum)

Stage

- big enough for 5 musicians and 1 dancer (minimum: 8 m wide, 4 m deep)

- ample space for dancing front center of the stage (minimum: 2 m x 2 m)

- one riser 2 m x 2 m x 0,4 m for drum kit

Monitor:

5 separate mixes on 4 powerful monitor speakers with sufficient amplification like

this: 4 floor monitors + 1 Wired in ear monitor(Own).
